STATIONARY CRANE
FOR SCRAP HANDLING FITTED WITH HYDRAULIC PEELGRAB

ABOUT STATIONARY CRANE FOR SCRAP HANDLING

Stationary Crane For Scrap Handling

SPECIFICATION

Bhupindra's Stationary boom type scrap handling crane have proven themselves in a number of waste and scrap handling applications, capable of handling a wide variety of materials with a wide array of options. Bhupindra's design a material handler to maximize production at facility, stationary electrical material handler are much less expensive to operate, safer, quieter and don't produce emissions like - diesel powered mobile equipments and maintenance cost are also less.

Your top benefits:

1 Green Efficiency:
Save fuel- reduce operating costs
Work quietly- protect operator and environment

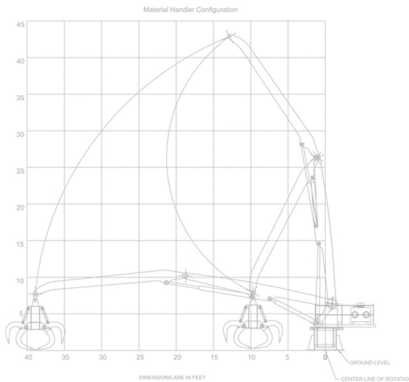

2 Peak Performance:
Durable mechanical system- stressed parts optimized
High Speeds- high load capacities

3 Maximum safety:
Safe entry and exit-no slip steps
State-of-the-art caners- entire work area in view

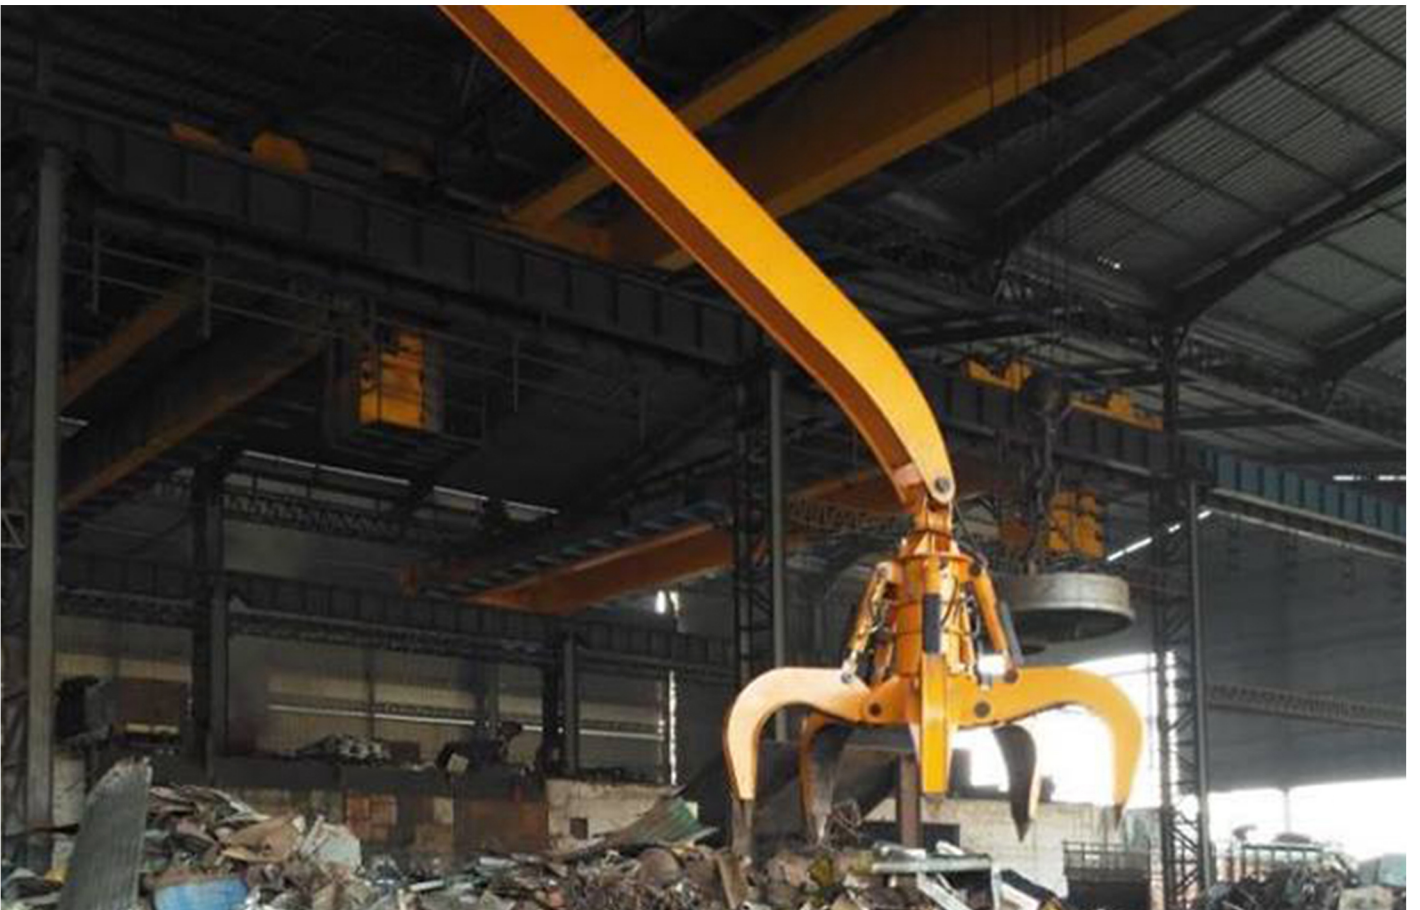

4 Maintenance and service made easy
Easy fault diagnosis- central measuring point
Easy maintenance- clear labeling

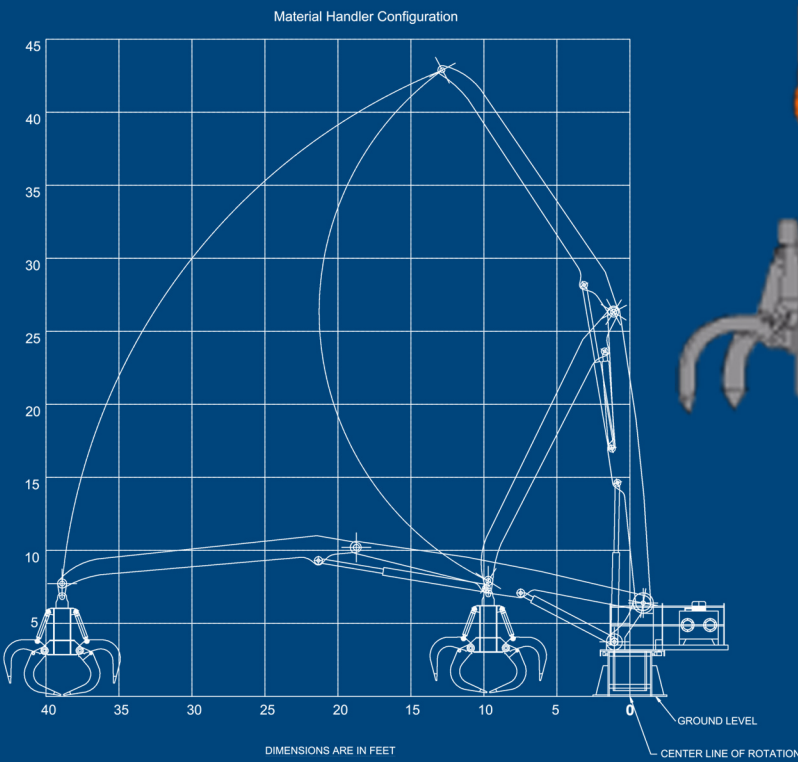

HANDLING FOR SCRAP STONES, ROCKS, WASTE AND INDUSTRIAL RESIDUES
